

## THE AUSTRIAN VET QUALITY INITIATIVE

- Joint and continuous work on the quality of vocational education and training (VET) schools and colleges
- Focus on the learning of students
- Successful education and training processes
- Sustainable school development and advancement of teaching and systematic quality management

## QIBB is a continuous learning and development process

**QIBB**, the Austrian VET Quality Initiative, aims to systematically safeguard and further develop school and teaching quality.

**QIBB** covers all VET school and college types:

- \_ Part-time vocational schools
- \_ Schools and colleges for engineering, arts and crafts
- \_ Schools and colleges of business administration
- \_ Schools and colleges of management and service industries
- \_ Schools and colleges of tourism
- \_ Schools and colleges of fashion and clothing and of artistic design
- \_ Schools of social occupations
- \_ Colleges of agriculture and forestry
- \_ Nursery teacher training colleges and colleges of social pedagogy

In **QIBB** we work with the following quality management instruments:

- \_ **Mission statement**
- \_ **Quality matrix:** objectives, implementation measures, results, indicators and evaluation methods
- \_ **Definition of key processes**
- \_ **Work programme or school programme incl. development and implementation plan:** objectives and implementation measures for the reporting period
- \_ **Management & performance reviews:** review and objective-setting discussions between managers to reflect and agree on development and implementation objectives
- \_ **Evaluation:** individual feedback, system feedback, Peer Review in **QIBB**
- \_ **Quality report:** school, regional and federal quality reports
- \_ **HR development:** continuing and further education and training for managers, teachers and staff

Quality assurance and development are implemented in **QIBB** as a target-driven continuous improvement process using the model of the four-phase quality assurance and improvement cycle (according to Deming).

The application of quality management instruments controls, supports and structures the process.

## QIBB – what for?

- The Austrian school-based VET system offers a large number of VET pathways. The quality assurance and development measures taken with **QIBB** help ensure a high level of training and the recognition of qualifications acquired through the training now and in the future.
- **QIBB** supports professional activities. The quality management instruments provided in **QIBB** help to systematically observe, evaluate and reflect on the quality of processes and results to ensure that well-founded measures can be taken.
- Within the framework of **QIBB** we jointly take steps to increase the schools' own responsibility and achieve an improvement in teaching which can be directly felt by students.

**QIBB** was launched by the General Directorate for Vocational Education and Training, Adult Education and School Sport of the Federal Ministry for Education, Arts and Culture to implement a comprehensive quality management system in Austrian VET schools and colleges.
